

Speaker Information

Ji An is a Municipal Application Specialist on the Global Market Strategy team at Trojan Technologies, a manufacture of ultraviolet disinfection equipment, based in London, Ontario, Canada. Her current experience and responsibilities at Trojan include UV system sizing and design responsibility for municipal disinfection systems for both wastewater and drinking water treatment plants. Prior to her current role, Ji was in the Research Department at Trojan, working as part of reactor design teams and specializing in disinfection applications and testing of reactor performance.

Ji holds a Bachelor's degree in Environmental Science from the University of Western Ontario, London, Canada. Over the last ten years, Ji has supported Consulting Engineers and Municipalities in the design and installation of UV systems globally. She has also presented at numerous conferences covering design and operational aspects of wastewater and drinking water UV systems including environmental contaminant applications.
